

Project 2: Choice

Paul Anderson, Mike Barton, Kevin Kincaid

Group 4 has decided to go with the loan dataset. It is of particular interest to one of our group members that just started a job in the financial industry, but we are also interested in employing different methods to work with the unbalanced data and larger amount of potential explanatory variables.

Our Group Contract remains the same, but has been re-submitted.

The box folder has been rearranged to now have a Project 2 folder: <https://oregon-state.app.box.com/folder/375417109400>

We also continue to utilize GitHub and have a new project repository there: https://github.com/bartonmike/ST538_Group4_Project2
